

# Dirty Jobs Wanted

**BALDOR • RELIANCE®**

Baldor • Reliance® Dirty Duty AC motors and variable speed drives are the solution to the most hostile operating environments imaginable. Ideal for wastewater treatment, process industries, shipboard applications, even tropical environments, Dirty Duty products excel in foul environments.

Dirty Duty motors feature a corrosion resistant proprietary bonded surface coating and stainless steel shaft extensions along with additional design features that stand up to whatever you can throw at them, while our NEMA 4X drive enclosures thrive where others fail. Need to fight dirty? Dirty Duty motors and drives will get the job done every time.
