

Tough Choice

BALDOR • RELIANCE

The American Petroleum Institute created strict motor performance and manufacturing quality standards to ensure safe, reliable operation in tough Petro Chemical applications. In fact, Baldor engineers participate on the working groups that are instrumental in establishing API 541 and 547 motor standards. Today Baldor • Reliance® API 547 general purpose and API 541 critical service motors are hard at work for Petro Chemical users around the world.

Count on Baldor • Reliance API motors to make your next tough Petro Chemical motor application an easy choice.
