## PNEU-FIT™ Replacement Elements

Compressed air and gas is essential in many industrial operations. Clean, oil-free air or gas reduces maintenance and replacement costs. Unfortunately, even atmospheric air contains impurities that must be removed. After compressing the air, the concentration of particles and moisture increases. This creates a rough mixture that can cause equipment damage such as instrument and tool malfunction. In addition, spray painting and breathing air can be rendered unusable, which will increase maintenance costs and ruin the end-product.

Pneumatech PNEU-FIT™ replacement filter elements utilize three manufacturing methods: multi wrap, pleated and molded technologies. To ensure performance equal to or better than that of the original equipment manufacturer, we select the method of construction which is best suited to ensure superior performance and optimum service life.

## THE PNEUMATECH ADVANTAGE

- High filtration efficiency
- Low operating costs
- Long life
- High quality
- Single source supplier

## Replacement Elements Available for the Following Housings

Airtek	Hankison
Balston	Hiross
Champion	Hydrovane
Comp Air	Ingersoll Rand
Comp Air Leroi	Kaeser
Deltech	Pioneer
Dollinger	Sullair
Domnick Hunter	Sullair Pallatek
Finite	Technolab
Flair/Technolab	Ultrafilter
Gardner Denver	Van Air
Great Lakes	Watts
Grimmer Schmidt	Zander

(Names above may be trademarked or registered by the individual manufacturers)
