QUINCY QGV 20-60

In a world that is dominated with cost and profitability in all aspects of business, Quincy Compressor provides you with an air compressor that produces only the amount of air that you require while using only the amount of energy required, maximizing your profitability. With rising energy costs providing universal impacts to businesses around the world, the Quincy QGV optimizes your energy consumption and provides you with the industry's most reliable variable speed air compressor. The Quincy QGV is designed to operate from 15% to 100% capacity and can be placed where other compressor manufacturers dare not go.

DOWNSTREAM PRESSURE SIGNAL PROVIDES STABLE PRESSURE

System pressure has a major impact on energy consumption, and the QGV is designed to provide the most stable pressure available from a compressor. Quincy's downstream signal option allows the compressor to react immediately to pressure changes close to the point of use, eliminating the lag often created by air treatment equipment pressure drop.

ADVANCED NETWORKING AND REMOTE MONITORING

All Quincy QGV controllers include advanced networking capabilities as standard equipment. Quincy's innovative approach allows for automatic sequencing and scheduled rotation between compressors.

Plus, QGV's can be monitored remotely with an optional Web\$ync II package. From simple web-interfaces to more advanced SCADA systems, Quincy offers specific solutions for different needs. Consult your Quincy representative to determine which solution best matches your requirements.

LOW DEMAND MODE ELIMINATES UNLOADED POWER

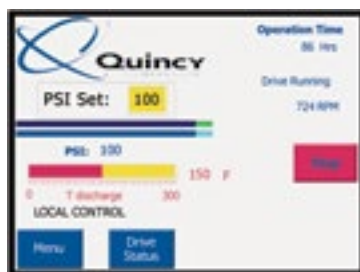

To prevent rapid cycling of the compressor during intermittent periods of low compressed air demand, the Quincy QGV features a low demand mode, which allows system pressure to rise above the set point prior to stopping the compressor when demand drops below its turndown capability. This ensures that system pressure does not drop below an acceptable level, and the QGV never runs unloaded. With a QGV in a lead position, this unique energy-saving mode also allows pressure to rise enough for additional network compressors to turn off in periods of low demand.

RELIABILITY YOU TRUST

MICROPROCESSOR CONTROLLER

The 6" color touch screen controller provides continuous monitoring and a graphic display of performance and efficiency. Built-in trending software tracks all critical operating parameters and transfers the data via standard communication protocol:

- Touch screen display and interface
- Speed and Percent Capacity
- Horsepower
- System Pressure
- Low Demand Mode
- True PID function control
- Remote system signal connection

SPEED OPTIMIZER

The Quincy QGV features Speed Optimizer Control. Dynamically responding to changes in ambient operating conditions, the QGV automatically adjusts the speed output to ensure maximum air flow is delivered from the compressor, without sacrificing dependability. This unique feature helps prevent nuisance alarms and keeps the QGV supporting your operation.

QUINCY'S INDUSTRY-LEADING 10-YEAR WARRANTY

Everyone says they have the best machine, but how do they support it? Quincy backs the QGV with the world's best Warranty! **WORLD'S BEST WARRANTY = 10 YEAR AIREND WARRANTY.** Five year warranty on major components, including variable frequency drive assembly, motor, coolers and reservoir. Other compressor manufacturers charge extra for similar plans, or an extended warranty.

LONG LIFE SYNTHETIC COOLANTS

QuinSyn fluids are custom engineered to perform and protect compressors in the harshest of conditions – ensuring that wear and tear is kept to a mini-

mum. Quincy offers different solutions for different needs.

QuinSyn XP: A custom blended POE lubricant, designed to last 12,000 hours. Per hour of operation, QuinSyn XP is the lowest operating cost solution available.

QuinSyn Plus: A custom blended POE/POA, QuinSyn Plus last 8,000 hours under typical operating conditions.

QuinSyn PG: A non-varnishing PAG coolant that typically lasts 8000 hours.

QuinSyn F: A custom blended food-grade lubricant that complies with the standards set forth by USDA H-1 and FDA 21 CFR 178.3570-Lubricants. QuinSyn-F typically lasts 6000 hours – far longer than most other food-grade lubricants.

LOWERING YOUR TOTAL COST OF OWNERSHIP

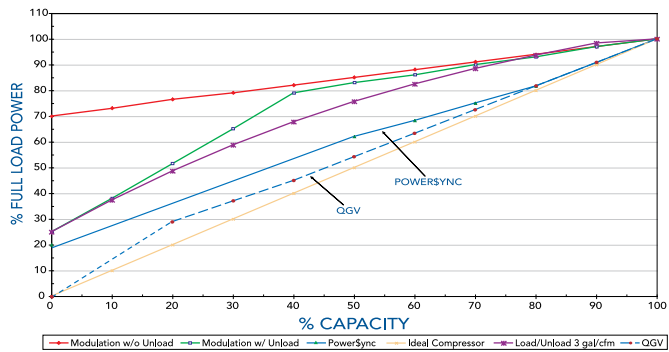

The Quincy QGV compressor family is engineered to deliver the lowest Total Cost of Ownership (TCO) among compressors in their class. Variable Speed Drive operation, along with Quincy's efficient airend design, ensures that overall energy consumption is minimized.

While other manufacturers recommend compressor overhauls every four or five years, Quincy designs to a higher standard. All QGV

airends are designed for an L10 bearing life of 100,000 hours – two to three times greater than the industry norm. Quincy is so confident in its design that we offer the industry-leading 10-Year Royal Blue Warranty standard on every QGV.
